

BloodLink | Global Privacy Policy

Version: 2.0.4

Classification: Confidential / Medical Data Protocol

Last Updated: January 11, 2026

1. DATA COLLECTION ARCHITECTURE

BloodLink collects specific categories of information to ensure the "Speed Protocol" functions during life-critical emergencies.

- **Identity Data:** Full name, age (to verify legal donation status), and government-issued ID (if verified).
- **Medical Data:** Blood group (A+, B-, etc.), last donation date, and self-reported health eligibility.
- **Geolocation Data:** Real-time GPS coordinates (used only during active "Request" windows to find the nearest donor).
- **Technical Data:** IP address, device type, and interaction logs within the LifeStream feed.

2. UTILIZATION OF INFORMATION

We process your data under the legal basis of "**Vital Interests**" and "**Consent**."

- **Emergency Matching:** To alert you when someone within your 5km radius requires your specific blood type.
- **Communication:** To send SMS/Push notifications for urgent blood requests.
- **Platform Integrity:** To prevent fraudulent requests or the illegal sale of blood products.

3. DATA SHARING & DISCLOSURE

We do not sell your medical or contact data to third-party advertisers. Data is only shared in the following scenarios:

- **With Recipients:** When you accept a donation request, your name and contact number are shared with the recipient/hospital to coordinate the transfusion.
- **Legal Necessity:** If required by law to prevent illegal commercial blood trafficking.
- **Emergency Services:** With authorized hospital staff during an active blood transfer.

4. THE "SHIELD" ENCRYPTION PROTOCOL

All sensitive medical data is protected by our **Shield Protocol**:

- **At Rest:** Data is encrypted using AES-256 bit encryption.
- **In Transit:** All communications are secured via TLS 1.3 (SSL).
- **Anonymization:** In our public "LifeStream" feed, donor identities are masked (e.g., "Donor R. just saved a life") to protect privacy while maintaining community motivation.

5. YOUR DATA RIGHTS

Under global data protection regulations (GDPR/CCPA/Local Health Acts), you have the following rights:

- **The Right to be Forgotten:** You may request the permanent deletion of your donor profile at any time.
- **Data Portability:** You can request a digital copy of your donation history.
- **Processing Restriction:** You can toggle "Offline" in your settings to stop real-time location tracking while remaining a member.

6. RETENTION POLICY

- **Active Profiles:** Retained as long as the account is active.
- **Emergency Logs:** Request history is stored for 5 years for medical audit purposes.
- **Deleted Accounts:** All PII (Personally Identifiable Information) is purged within 30 days of an account closure request.

7. CONTACT THE DATA PROTECTION OFFICER (DPO)

If you have concerns regarding how your blood group data is stored, please contact: **Email:** privacy@bloodlink.network

Address: Data Privacy Division, BloodLink Emergency HQ.

Implementation for your React Project:

1. **Direct Download:** Use the same `handleDownload` logic from the Terms of Use to let users save this as a PDF.
2. **Consent Checkbox:** On your **Sign Up** page, ensure you have a link that says: *"I agree to the Privacy Policy's use of my blood group and location data."*
3. **Visual Consistency:** Use the same `slate-950` and `red-600` theme as your About Us and Terms page.
